

Computation Products Group Technical Documents

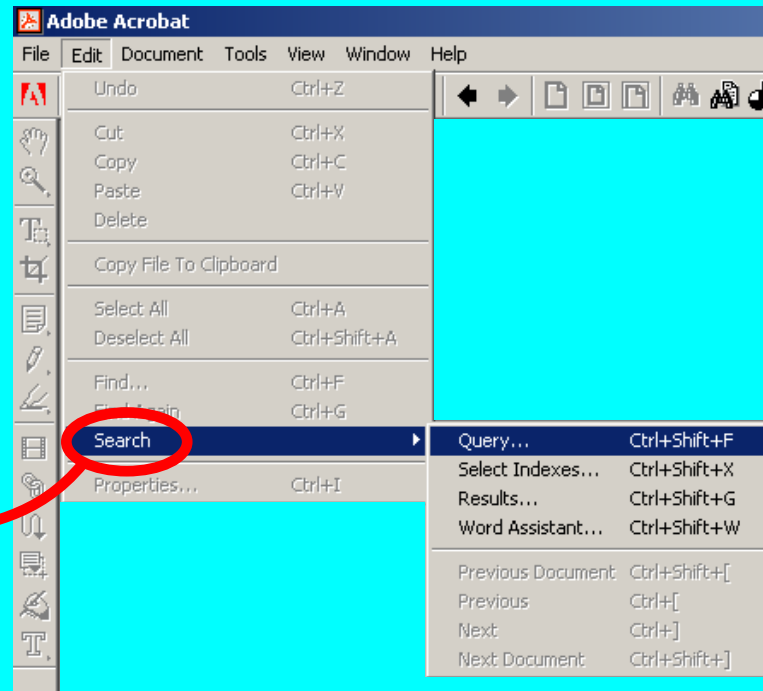

Documents

This CD-ROM contains information on all current and recent production PC microprocessors manufactured by AMD. The documentation is in Adobe Acrobat PDF format.

Adobe Acrobat is available with or without the search plug-in. You must have the Search Plug-In installed for Adobe Acrobat Exchange or Reader in order to use the comprehensive document indexes contained on this CD-ROM.

You can determine whether your copy is search-enabled by selecting Tools (Edit in version 4.0) on the menu bar. Search-enabled software has "Search" as the lower-most option.

Search-capable readers are provided for major operating systems in the Acrobat directory on this CD-ROM.

Click on any button with blue letters to go to that location on the internet.
